विविध उपक्रमातील स्वतःचा सहभाग

Participation of Student Teacher in various activities.

* Reflection of student teacher on planning of teachers.

Teaching is hard work and source
Teachers never grow to be anything better
than mediocre. The great teacher, however
work tirelessly to create a challenging,
nourishing environment for their students.

Preparation and planning is
nothing special but some extra reading
regarding the teaching units for effective
teaching. So that more example can be
given and students understand it easily.
We plan to prepare the lesson,
read the grammar, idioms. We prepare
the visual teaching aids and also
prepare the manuscript. We provide the
student a supportive collaborative
environment. We focus on share, decision
making and team work as well as
community building.

My name is Anurita Arun Baste,
when I went in our classroom and
by analysing and evaluating this inform-
-ation we identify and explore that
our own practices and underlying beliefs.
This may lead to changes and improvements
in our teaching.

Reflective teaching therefore implies a
more systematic process of collecting
recording and analysing our thoughts
and observation, as well as those of our
students and then going on to making
changes.

Beginning the process of reflection:-

I may begin a process of reflection
in response to a particular problem that
has arisen with any classes, or simply
as a way of finding out more about my
teaching. I may decide to focus on a
particular class of students or to look
at a feature of my teaching.

Teacher diary:- This is the easiest way
to begin a process of reflection. Since it
is purely personal after each lesson I
write in a notebook about what happened
and my own reactions.

* Reflection of student teacher on Evaluation of student:

The classroom assessment and evaluation under the active management of teacher can also serve important professional development purpose. Since the information resulting from such evaluation provides teachers with valuable feedback about their instructional effectiveness that they can use to develop.

This formal evaluation is used to judge student achievement that is how well the student has learned the knowledge. The primary purpose of assessment is to improve student learning and teachers teaching as both respond to the information it provide. The reflection of student teacher on evaluation of student give assessment for learning on going process that arises out of the interaction between teaching & learning.

The evaluation help us to identify areas of improvement and ultimately help us to realise our goal more efficiently.

The evaluation of student help us to evaluate between poor, middle and extra ordinary student.
